

# SOMweb

The secure Smart Home solution where your data stays in the garage

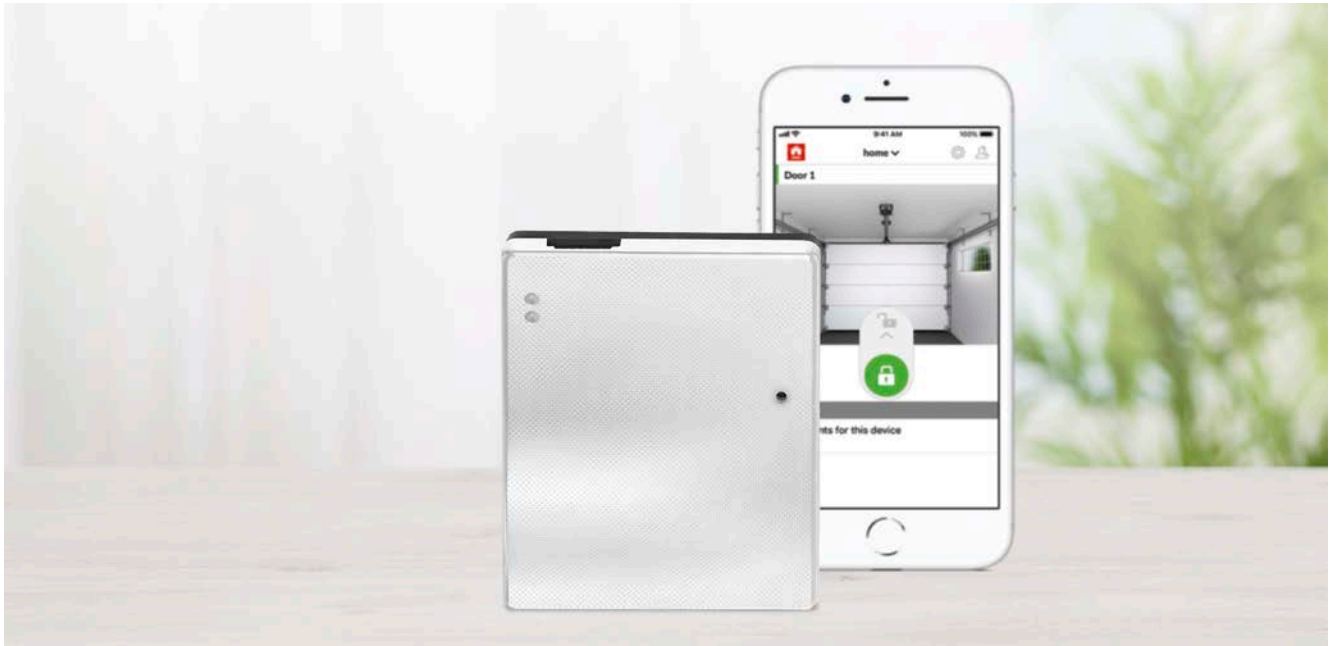

The Smart Home solution allows you to control operators extremely simply via app or browser from a smartphone, tablet or PC. The data is safe, as it is not saved on external servers, but literally remains at home.

## Functions

- Open or close the door
- Check the door status
- Up to 10 operators can be controlled with a SOMweb.
- Optional video monitoring via bookable plug-in video function.
- Including user management and access control for 10 users
- Optional expansion to 50 users or an unlimited number of users via bookable user plug-ins.
- Real-time notification of door movements via app or e-mail.
- HomeKit technology allows the use of the Apple Home App to create set-ups combining various devices. For example, to switch the hall light on automatically when you open the garage in the evening.
- Creation of own events via the IFTTT platform. For example, automatic opening and closing of the garage at a defined distance from the door or at a specified time.
- Supports voice control via Siri and Google Assistant. Voice control via Amazon Alexa is possible using IFTTT.

### Technology

- **No saving or processing of data on external servers.**
- Communication between SOMweb and radio receiver via SOMloq2 radio control system with 128-bit AES encryption. No wiring to the operator is necessary.
- No additional sensors are required.
- Integrated WiFi module
- USB port (e. g. for connection of a LAN adapter)
- Universal for smartphone, tablet or PC
- Apps for operation are available for Android and iOS.
- Operation is possible via all common browsers. This makes the system independent of the operating system used.
- Can be controlled via the home network or via the Internet.

### Compatibility

Smart Home solution for garage door operators with the SOMloq2 radio control system from date of manufacture 12/2018. Further operator types and radio receivers to follow.

#### SOMweb app

Free apps for the Android operating system and iOS are available for download from Google Play and in the App Store.

The Smart Home solution SOMweb can only be operated if a photocell is connected.
